

# **Rulebook TECH UPDATE**

## **Misc. OHV200 Updates:**

**EFFECTIVE DATE: 03/31/2017**

**Addition to Rule (in red):**

**40.4.11:** Stock Huayi or Ruixing type carb only. **There must be a factory edge, not rounded or smoothed over, all the way around the entrance and exit to the vent of carburetor. Can be compared to a stock carburetor. No extra holes drilled in carburetor anywhere.**

**Current Rule:**

**40.4.11.8.1:** Filter adapter max 1.375" height. Filter is non tech; no "ram air".

**New Rule:**

**40.4.11.8.1:** Filter adapter max 1.375" height. No "ram air". Any filter that is open on the end must be covered over with tape or pre-filter that will not allow any air to enter filter from the end of filter. Air must enter filter from the sides. If this type of filter is used, turn them toward the rear of kart.

**Current Rule:**

**40.4.22.1:** Length: 5.275" +.010" maximum;

**New Rule (clarification):**

**40.4.22.1:** 5.285" Maximum, No Minimum Length
